SUMMARY

Junior Full Stack .NET Developer with hands-on experience in building web applications using ASP.NET Core and Angular. Passionate about software engineering, problem-solving, and developing scalable systems. Completed a 6-month intensive training at ITI, where I built real-world projects and strengthened my skills in backend and frontend development. Always eager to learn, improve, and contribute to a professional development team.

INTERNSHIP

Full Stack .NET Developer Intern

12/2025 – 06/2026

Information Technology Institute (ITI)

- Completed intensive training in Full Stack Web Development using .NET technologies.
- Built full-stack applications using ASP.NET Core and Angular.
- Worked with SQL Server for database design and development.
- Applied software engineering principles and design patterns.
- Collaborated on real-world projects in a team environment.

PROJECTS

AI Career Coach Platform

05/2026 – 06/2026

Technologies: ASP.NET Core Web API, Angular, SQL Server, EF Core, JWT, Semantic Kernel, OpenAI, Vector Database, Docker, GitHub Actions, xUnit

- Developed an AI-powered career coaching platform for CV analysis, job recommendations, personalized roadmaps, and mock interviews.
- Architected and implemented an N-Tier Architecture using ASP.NET Core Web API, BLL, and DAL.
- Integrated LLMs using Semantic Kernel and OpenAI, and implemented RAG with a Vector Database to deliver personalized career guidance.
- Developed secure authentication and authorization using JWT and role-based access control.
- Containerized the application using Docker, implemented CI/CD with GitHub Actions, and developed Unit Tests using xUnit.

Gym Management System

04/2026 – 06/2026

Technologies: ASP.NET Core MVC, EF Core, SQL Server, SignalR, Hangfire, Stripe, Serilog

- Developed a full-featured Gym Management System using ASP.NET Core MVC and SQL Server.
- Architected and implemented an N-Tier Architecture with Repository Pattern and Unit of Work to ensure maintainability, scalability, and separation of concerns.
- Implemented secure authentication and authorization using ASP.NET Identity, Claims-Based, Policy-Based, and Resource-Based Authorization.
- Designed and developed subscription management, attendance tracking, payment processing, and membership lifecycle workflows.
- Integrated Stripe for online payment processing and automated billing operations.
- Implemented real-time notifications using SignalR and scheduled background jobs using Hangfire.
- Added centralized logging and monitoring using Serilog for auditing and troubleshooting.

EDUCATION

Bachelor of Computer Engineering

Faculty of Engineering, Al-Azhar University

2020 – 2025

Cairo, Egypt

SKILLS

- Languages: C#, JavaScript, TypeScript, Python, C++
- Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap
- Backend: ASP.NET Core, ASP.NET Core MVC, ASP.NET Core Web API, EFCore, SignalR, Hangfire
- Databases: SQL Server
- Software Engineering: OOP, SOLID Principles, Design Patterns, Repository Pattern, Unit of Work, Dependency Injection, RESTful APIs
- Tools: Git, GitHub, Postman, Visual Studio, VS Code, Figma, Docker, Serilog, Stripe

CERTIFICATES

CS50: Introduction to Computer Science (Harvard University)

- Learned programming fundamentals, problem-solving, and algorithms
- Built small projects applying C, Python, and web development basics

RESTful API Design (Coursera)

- Learned how to design, develop, and document RESTful APIs using best practices.
- Implemented CRUD operations, authentication, and proper HTTP status codes.
- Applied concepts in small projects to build functional APIs for web applications.
